Assignment2

Han Kim

2/14/2019

All work was done through rstudio.cloud.

Question 1

Alexander_the_Great wget webpage was read into R using readLines function. Length was used to get the number of lines.

```
AG = readLines("/cloud/project/ds4bme/assignment2/Alexander_the_Great")
num_lines = length(AG)

message(num_lines)
```
